PROJECTS

Sociopedia MERN ⌨
Express.js | React.js | MongoDB | Node.js

Inspired by popular social media web apps, Sociopedia is a comprehensive social-media website made using the MERN stack. It includes key features such as post creation, liking, image uploading, and following other users.

Skill Up NCU ⌨ 🔗
Next.js | NextAuth | Firebase | VERCEL

Skill Up NCU is an online forum built for the university student community to ask doubts from their peers and seniors. With a rich markdown editor, with image support, ask your question and post it within a matter of seconds.

EVOGYM Landing Page ⌨ 🔗
React.js | TypeScript | Tailwind CSS | Framer Motion | Cloudflare

A clean and responsive landing page made for a GYM using VITE and animated using Framer Motion. Deployed using Cloudfare.

Supa-Radio ⌨ 🔗
Svelte | SvelteKit | Three.js | Supabase | Firebase

An Interactive Music Visualizer created using Supabase & Hosted via Firebase. Key features include Supabase Auth, Database, Storage, Realtime Chat.
